Mr. Baker, I am sorry for the delay in this matter, As discussed with Tony from the Salt Lake office the loading ,stocking and roads are to be included in the variance, instead of the five acre mining area as Deloy had discussed with Tony at length. The reason for not sending the maps as planned, , Brent from the Moab office he had said not to worry about sending them that he would take care of this matter himself. I am sorry I had not taken care of this matter myself. If you still need them I would gladly send or fax them to your as soon as possible . Two weeks ago I did go out to the travertine mine # * and reflagged it as needed . We have decided to to apply for a big mine permit as discussed with Brent also, as he did mention that that could take up to a year for approval. Once again I apologize for any inconvenience and for the delay in this matter likewise we have decided to claim the other disturbance as soon as possible. Earl K Shumway
